Preface

The famous Hotine-Marussi Symposium series is held once every four years and has been traditionally focused on mathematical geodesy. The VI Hotine-Marussi Symposium was organized by the Intercommission Committee on Theory (ICCT) and successfully held from 29 May to 2 June, 2006, at Wuhan University, PR China, with 162 registered scientists and students from 20 countries and regions, in addition to many more unregistered attendees. It was kindly sponsored by the International Association of Geodesy and Wuhan University.

The VI Hotine-Marussi Symposium was unique in the senses that: (i) this is the first Hotine-Marussi symposium to go beyond mathematical geodesy; (ii) this is the first time for a Hotine-Marussi symposium to be held outside Europe; and (iii) this is the first time that a Hotine-Marussi symposium was organized by an IAG entity instead of by Prof. F. Sanso and his group, as was traditionally the case. An attentive reader might soon notice the change of the title for the VI Hotine-Marussi Symposium. Indeed, this should be one of the most important aspects of the Symposium and was carefully designed as a result of many hours of discussion among Prof. A. Dermanis (ICCT Vice President), Prof. F. Sanso (IAG Past President and past organizer of the Hotine-Marussi symposia), Prof. J.N. Liu (President of Wuhan University) and P.L. Xu (ICCT President), in particular, also among the Scientific Committee members Prof. J.Y. Chen, Prof. B. Chao, Prof. H. Drewes, Prof. H.Z. Hsu, Prof. C. Jekeli, Dr. N.E. Neilan, Prof. C. Rizos and Prof. S.H. Ye.

In fact, as part of the IAG restructuring, the ICCT was formally approved and established after the IUGG XXIII Assembly in Sapporo, to succeed the former IAG Section IV on General Theory and Methodology, and more importantly, to actively and directly interact with other IAG Entities. The most important goals and/or targets of the ICCT are: (1) to strongly encourage frontier mathematical and physical research, directly motivated

by geodetic need/practice, as a contribution to science/engineering in general and the foundations for Geodesy in particular; (2) to provide the channel of communication amongst the different IAG entities of commissions/services/projects, on the ground of theory and methodology, and directly cooperate with and support these entities in the topics-oriented work; (3) to help the IAG in articulating mathematical and physical challenges of geodesy as a subject of science and in attracting young talents to geodesy; and (4) to encourage closer research ties with and directly gets involved with relevant areas of the Earth Sciences, bearing in mind that geodesy has been playing an important role in understanding the physics of the Earth. In order to partly materialize the ICCT missions, we decided to use the VI Hotine-Marussi Symposium as a platform for promoting what we believe would be of most importance in the near future and for strengthening the interaction with commissions. This should clearly explain why we further decided to modify the traditional title of Hotine-Marussi symposia from “Mathematical Geodesy” to “Theoretical and Computational Geodesy”, with a subtitle to emphasize challenge, opportunity and role of modern geodesy, and why you could see from our symposium programs that the IAG President Prof. G. Beutler, the IAG Secretary General Prof. C.C. Tscherning and IAG commission Presidents Prof. H. Drewes, Prof. C. Rizos were invited to deliver invited talks at the Symposium, with our great honour, pleasure and gratitude.

Scientifically, recognizing that geodetic observing systems have advanced to such an extent that geodetic measurements:

- (i) are now of unprecedented high accuracy and quality, can readily cover a region of any scale up to tens of thousands of kilometers, consist

of non-conventional data types, and can be provided continuously;

- (ii) consequently, demand new mathematical modeling in order to obtain best possible benefit of such technological advance; and
- (iii) are finding applications that were either not possible due to accuracy limit or were not thought of as part of geodesy such as space weather and/or earth-environmental monitoring,

we designed and selected for the symposium the following five topics:

- (i) Satellite gravity missions: open theoretical problems and their future application;
- (ii) Earth-environmental, disaster monitoring and prevention by Geodetic methods;
- (iii) GNSS: Mathematical theory, engineering applications, reference system definition and monitoring;
- (iv) Deterministic and random fields analysis with application to Boundary Value Problems, approximation theory and inverse problems; and
- (v) Statistical estimation and prediction theory, quality improvement and data fusion.

Some of these are either of urgent importance to geodesy or are of potentially fundamental importance to geodesy, but not necessarily limited to geodesy, at the very least, from our point of view. To name a few examples, let us say that: (i) satellite gravity missions are of current importance in and far beyond geodesy, environmental monitoring, for example; (ii) seafloor geodesy will become essential in the next one or two decades in Earth Sciences, even though the invited speakers could not find time to contribute their papers on the topic; and (iii) mixed integer linear models should be a subject that geodesists can make greatest possible contributions to mathematics and statistics.

Finally, we thank the International Association of Geodesy and Wuhan University for financial support. We thank all the conveners: B. Chao, D. Wolf, N. Sneeuw, J.T. Freymueller, K. Heki, C.K. Shum, Y. Fukuda, D.-N. Yuan, P. Teunissen, A. Dermanis, H. Drewes, Z. Altamimi, B. Heck, Karlsruhe, P. Holota, J. Kusche, B. Schaffrin, Y.Q. Chen, H. Kutterer and Y. Yang, for their hard work to convene and to take care of the review process of the Proceedings papers, which are essential to guarantee the success of the Symposium and the quality of the Proceedings. We also thank the LOC team, in particular, Dr. X. Zhang and Ms Y. Hu, for all their hard work.

Geodetic Institute, University of Hannover, Nien-
burger Straße 1, D-30167 Hannover, Germany

J. Nicolas

Laboratoire de Géodésie et Géomatique (L2G),
Ecole Supérieure des Géomètres et Topographes
(ESGT/CNAM), 1 Boulevard Pythagore, F-72000
Le Mans, France

D. Odijk

Delft Institute of Earth Observation and Space
Systems (DEOS), Delft University of Technology,
Kluyverweg 1, 2629 HS Delft, The Netherlands,
e-mail: d.odijk@TUDelft.nl

A. Pagamisse

Department of Mathematics, São Paulo State Uni-
versity, UNESP, Roberto Simonsen, 350, Pres.,
Prudente, SP, Brazil

T. Peters

Institute of Astronomical and Physical Geodesy,
Technische Universität München, Arcisstr.
21, D-80290 München, Germany, e-mail:
peters@bv.tum.de

D. Petrovich

Institute of Mathematics, Tampere University of
Technology, P.O. Box 553, 33101 Tampere, Finland

R. Piché

Institute of Mathematics, Tampere University of Technology, P.O. Box 553, 33101 Tampere, Finland

W.G.C. Polezel

Department of Cartography, São Paulo State University, UNESP, Roberto Simonsen, 350, Pres., Prudente, SP, Brazil

M. Poutanen

Department of Geodesy and Geodynamics, Finnish Geodetic Institute, Geodeetinrinne 2, FI-02430 Masala, Finland

M. Reguzzoni

Geophysics of the Lithosphere Department, Italian National Institute of Oceanography and Applied Geophysics (OGS), c/o Politecnico di Milano, Polo Regionale di Como, Via Valleggio, 11, 22100 Como, Italy

C. Rizos

School of Surveying and Spatial Information Systems, University of New South Wales, Sydney, NSW 2052, Australia

M. Roggero

Politecnico di Torino, Department of Land Engineering, Environment and Geotechnologies, Corso Duca degli Abruzzi 24, 10129, Torino, Italy, e-mail: roggero@atlantic.polito.it

D.R. Roman

National Geodetic Survey, Silver Spring, MD 20910, USA

F. Sacerdote

Dipartimento di Ingegneria Civile, Università di Firenze, Via S. Marta 3, 50139 Firenze, Italy

J. Saleh

National Geodetic Survey, Silver Spring, MD 20910, USA

L. Sánchez

Deutsches Geodätisches Forschungsinstitut, DGFI, Alfons-Goppel-Str. 11, D-80539 Munich, Germany

F. Sansò

DIIAR, Politecnico di Milano, Polo Regionale di Como, Via Valleggio, 22100 Como, Italy

B. Schaffrin

Geodetic Science Program, School of Earth Sciences, The Ohio State University, 125 S. Oval Mall, 275 Mendenhall Lab., Columbus, Ohio 43210, USA

M. Schreiner

University of Buchs, Laboratory for Industrial Mathematics, Werdenbergstrasse 4, CH-9471 Buchs, Switzerland, e-mail: schreiner@ntb.ch

M.A. Sharifi

Institute of Geodesy, Universität Stuttgart, Geschwister-Scholl-Str. 24D, D-70174 Stuttgart, Germany

C. Shen

Institute of Seismology, CEA, Wuhan 430071, P.R. China

Y. Shen

Department of Surveying and Geo-informatics, Tongji University, 1239 Siping Road, Shanghai 200092, P.R. China

C. Shi

GNSS Research Center, Wuhan University, Wuhan, Hubei, P.R. China

C.K. Shum

Geodetic Science, School of Earth Sciences, The Ohio State University, 125 S. Oval Mall, 275 Mendenhall Lab., Columbus, Ohio 43210, USA

M.G. Sideris

Department of Geomatics Engineering, University of Calgary, 2500 University Drive N.W., Calgary, Alberta, Canada T2N 1N4, e-mail: sideris@ucalgary.ca

N. Sneeuw

Geodätisches Institut, Stuttgart Universität, Stuttgart D-70147, Germany, e-mail: sneeuw@gis.uni-stuttgart.de

N. Sneeuw

Institute of Geodesy, Universität Stuttgart, Geschwister-Scholl-Str. 24D, D-70174 Stuttgart, Germany

E.M. Souza

Department of Cartography, São Paulo State University, UNESP, Roberto Simonsen, 350, Pres., Prudente, SP, Brazil

L. Sui

Zhengzhou Institute of Surveying and Mapping, 66th Longhai Middle Road, Zhengzhou 450052, P.R. China, e-mail: suilifen@163.com

S. Sun

Institute of Seismology, CEA, Wuhan 430071, P.R. China

P.J.G. Teunissen

Delft Institute of Earth Observation and Space systems (DEOS), Delft University of Technology, Kluyverweg 1, 2629 HS Delft, The Netherlands, e-mail: P.J.G.Teunissen@TUDelft.nl

H. Tian

School of Geodesy and Geomatics, Wuhan University, Wuhan 430079, P.R. China

C.C.J.M. Tiberius

Delft institute of Earth Observation and Space systems (DEOS), Delft University of Technology, Kluyverweg 1, 2629 HS Delft, The Netherlands

N. Tselfes

DIIAR, Politecnico di Milano, Polo Regionale di Como, Via Valleggio, 11, 22100 Como, Italy

J.P. van Loon

Delft Institute of Earth Observation and Space Systems (DEOS), TU Delft, Kluyverweg 1, P.O. Box 5058, 2600 GB Delft, The Netherlands

G. Venuti

DIIAR, Politecnico di Milano, Polo Regionale di Como, Via Valleggio, 11, 22100 Como, Italy

S. Verhagen

Delft Institute of Earth Observation and Space systems, Delft University of Technology, Kluyverweg 1, 2629 HS Delft, The Netherlands, e-mail: a.a.verhagen@TUDelft.nl

J. Wang

Department of Surveying and Geo-informatics, Tongji University, Siping Road 1239, 200092 Shanghai, P.R. China

W. Wang

The School of Geodesy and Geomatics, Wuhan University, P.R. China; Zhengzhou Institute of

Surveying and Mapping, 66th Longhai Middle Road, Zhengzhou 450052, P.R. China, e-mail: wangwei_sgg@163.com

X. Wang

College of Geodesy and Geomatics, Wuhan University, Wuhan 430079, P.R. China; School of Geodesy & Geomatics, Wuhan University, 129 Luoyu Road, Wuhan 430079, P.R. China; Key Laboratory of Geomatics and Digital Technology of Shandong Province, Shandong University of Science and Technology, 579 Qianwangang, Qingdao 266510, P.R. China; Research Center for Hazard Monitoring and Prevention, Wuhan University, 129 Luoyu Road, Wuhan 430079, P.R. China

Y.M. Wang

National Geodetic Survey, Silver Spring, MD 20910, USA

Z.T. Wang

The Key Laboratory of Geospace Environment and Geodesy, Ministry of Education, School of Geodesy and Geomatics, Wuhan University, Wuhan 129 Luoyu Road, Wuhan 430079, P.R. China

F. Wild

Geodetic Institute, University of Karlsruhe, Englerstr. 7, D-76128 Karlsruhe, Germany, e-mail: wild@gik.uni-karlsruhe.de

A. Xiang

Institute of Seismology, CEA, Wuhan 430071, P.R. China

Y. Xiong

Department of Geomatic Engineering, Southwest Jiaotong University, Chendu 610031, P.R. China

C. Xu

Department of Geomatics Engineering, The University of Calgary, 2500 University Drive N.W., Calgary, Alberta, Canada T2N 1N4; School of Geodesy & Geomatics, Wuhan University, 129 Luoyu Road, Wuhan 430079, P.R. China; Key Laboratory of Geomatics and Digital Technology of Shandong Province, Shandong University of Science and Technology, 579 Qianwangang, Qingdao 266510, P.R. China; Research Center for Hazard Monitoring and Prevention, Wuhan University, 129 Luoyu Road, Wuhan 430079, P.R. China, e-mail: xuc@ucalgary.ca

R. Xu

Center for Geomatic Engineering, Southwest Jiaotong University, Chengdu, P.R. China

H. Yin

Department of Geomatic Engineering, Southwest Jiaotong University, Chengdu 610031, P.R. China

L. Yuan

Center for Geomatic Engineering, Southwest Jiaotong University, Chengdu, P.R. China

C. Zhang

Department of Geodesy and Navigation Engineering, Zhengzhou Institute of Surveying and Mapping, Longhai Middle Road, No. 66#, Zhengzhou, Henan Province, P.R. China

H.M. Zhang

School of Power and Mechanical Engineering, Wuhan University, Hubei 430072, P.R. China

Q. Zhang

College of Geological Engineering and Geomatics, Chang'an University, No. 126 Yanta Road, Xi'an, Shaanxi, P.R. China

X. Zhang

School of Geodesy and Geomatics, Wuhan University, 129, Luoyu Road, Wuhan 430079, P.R. China

C. Zhao

College of Geological Engineering and Geomatics, Chang'an University, No. 126 Yanta Road, Xi'an, Shaanxi, P.R. China

D. Zhao

School of Geodesy and Geomatics, Wuhan University, Hubei Province, P.R. China; Department of

Geodesy and Navigation Engineering, Zhengzhou Institute of Surveying and Mapping, Longhai Middle Road, No. 66#, Zhengzhou, Henan Province, P.R. China

J.H. Zhao

School of Geodesy and Geomatics, Wuhan University, Wuhan, Hubei 430079, P.R. China

Q.L. Zhao

GNSS Research Center, Wuhan University, Wuhan, Hubei, P.R. China

L. Zhou

Center for Geomatic Engineering, Southwest Jiaotong University, Chengdu, P.R. China

X.W. Zhou

Department of Survey Engineering and Geomatics, Central South University, Changsha, Hunan Province 410083, P.R. China, e-mail: zhxiaowei@sohu.com

J.J. Zhu

Department of Survey Engineering and Geomatics, Central South University, Changsha, Hunan Province 410083, P.R. China

P. Zhu

Institute of Geophysics, CEA, Beijing 100081, P.R. China

X. Zhu

School of Computer Science and Technology, Shandong University of Technology, Zibo, P.R. China

Z.R. Zou

Department of Survey Engineering and Geomatics, Central South University, Changsha, Hunan Province 410083, P.R. China
